OFFICE OF INFORMATION MEMORANDUM NO. 64, SUPPLEMENT 1

The Director of the Office of War Information has issued a supplement to OWI Regulation 8, requiring clearance by the Inter-Agency Publications Committee of all "riding" requisitions for printing, and pre-clearance with the same committee of any changes in format, additions, or frequency of issue of regular periodicals of an informational nature. All new periodicals or requests for publication of any previously discontinued periodical publications are to be submitted to the Committee for approval as an information publication or certified as administrative in nature.

All requests for riding requisitions or changes in periodical publications should be sent to Distribution Control Officer, Room 457 Administration Building, Telephone Branch 2258 or 3511.

The text of the OWI regulation is as follows:

I. Riders to Government Printing Office Requisitions:

a. As used in this Supplement, the term "rider" means a request by an agency for the printing of copies for its use in addition to the copies already requisitioned by the agency making the original printing request.

b. After November 15, 1944 any rider made by an Executive Department or Agency to a Government Printing Office Requisition for informational purposes, shall be cleared by the Inter-Agency Publications Committee as a prerequisite for printing by the Government Printing Office.

II. Periodical Publications:

a. To avoid misunderstandings, it is hereby expressly stated that any new periodical publication, or any previously discontinued periodical publication of an Executive Department or Agency, before being printed or otherwise processed in a quantity exceeding 100 copies per issue, shall be either approved, or certified as administrative in nature, by the Inter-Agency Publications Committee.

b. Regular periodicals of an informational nature now being issued by Executive Departments or Agencies shall not increase the number of copies, frequency of issue, number or size of pages, or weight of paper, without approval by the Inter-Agency Publications Committee.

*Keith Himebaugh*

Director of Information

1. The first part of the paper is devoted to a discussion of the general principles of the theory of the structure of the atom. It is shown that the structure of the atom is determined by the laws of quantum mechanics, and that the structure of the atom is a function of the atomic number and the atomic weight of the element.

2. The second part of the paper is devoted to a discussion of the experimental methods used to determine the structure of the atom. It is shown that the structure of the atom can be determined by a variety of methods, including X-ray diffraction, electron diffraction, and neutron diffraction.

3. The third part of the paper is devoted to a discussion of the results of the experiments. It is shown that the structure of the atom is a function of the atomic number and the atomic weight of the element, and that the structure of the atom is determined by the laws of quantum mechanics.

4. The fourth part of the paper is devoted to a discussion of the conclusions of the experiments. It is shown that the structure of the atom is a function of the atomic number and the atomic weight of the element, and that the structure of the atom is determined by the laws of quantum mechanics.
